Portfolio website: https://www.sujanpaudyal.com.np/

Professional Summary

Geology graduate (B.Sc., First Division) and Civil Sub-Engineer with 3+ years on a 132 kV mountain transmission line project. Skilled in geological mapping, geomorphology, site investigation, surveying, and foundation monitoring. Published research on Rasuwagadhi–Kerung flood hazards and infrastructure vulnerability. Seeking a thesis-based Master's in Geology or Earth Sciences focused on mountain geohazards and resilient infrastructure.

Education

Bachelor of Science (B.Sc.) in Geology | 2024
Tri-Chandra Multiple Campus, Tribhuvan University, Kathmandu, Nepal
First Division; final result: 60.35%
Relevant coursework: Engineering Geology, Geomorphology, Soil Mechanics.

Higher Secondary Education, Science Stream (Civil Engineering Focus) | 2020
Shree Padma Secondary School, Bhaktapur, Nepal
GPA: 3.19/4.00 (B+)
Relevant subjects: Geotechnical Engineering, Road Construction, Physics, Chemistry, Mathematics.

Secondary Education Examination (SEE), Civil Engineering Technical Stream | 2018
Shree Bhanu Jana Secondary School, Taplejung, Nepal
GPA: 3.32/4.00 (A).

Research & Publications

Journal Article

Paudyal, S. (2026). The flood and challenges of Rasuwagadhi–Kerung border. *GeoWorld Students Journal*, Tribhuvan University.
Publication: Tribhuvan University journal PDF

- Examined flood dynamics and transboundary challenges affecting the high-mountain Rasuwagadhi–Kerung corridor.
- Analyzed geological and geomorphological factors related to infrastructure vulnerability in a mountain border region.
- Discussed implications for disaster risk reduction, hazard awareness, and infrastructure resilience.

Undergraduate Geological Fieldwork | Tribhuvan University | 2023 & 2024

- Conducted geological mapping and rock identification across field locations and varied terrain settings.
- Applied geomorphology and soil mechanics concepts to terrain evaluation and infrastructure site-suitability assessments.
- Supported field data collection, laboratory analysis, and preparation of Central Nepal geological field reports.

Professional Experience

Civil Sub-Engineer | Sept. 2023– Present
Rastriya Prasaran Grid Company Limited (RPGCL)
Mewa–Changhe 132 kV Transmission Line Project, Taplejung, Nepal

- Supervised tower foundation construction at Taplejung sites in challenging terrain, monitoring compliance with engineering requirements and applicable safety standards.
- Conducted site investigations, levelling surveys, and soil testing activities at different tower locations to support construction planning and foundation assessments.
- Tracked construction quantities, maintained daily site records, and prepared daily progress reports for project monitoring.
- Coordinated with multiple contractors, engineers, and relevant authorities to address site-level issues and support project implementation.
- Documented foundation-construction observations in quality monitoring records to support technical reporting.

On-the-Job Trainee, Small-Scale Hydropower Investigations | Six months | Aug, 2020
Madhyaphawa Khola Jalabidhyut Co-operative Ltd., Phung, Nepal

- Applied civil engineering and geological knowledge to small-scale hydropower project investigations.

Civil Engineering Intern | Three months per municipality | Suryabinayak Municipality (Jul, 2019) and Phungling Municipality (Jun, 2018), Nepal

- Examined municipal civil works practices and local geotechnical assessment procedures through supervised field exposure.

Technical Skills

Geological & Geotechnical Skills: Geological mapping; rock identification; engineering geology; geomorphological interpretation; terrain assessment; site investigation; soil mechanics; soil testing exposure.

Field Methods & Surveying: Field data collection; levelling surveys; site assessment; geological field reporting; laboratory analysis support.

Engineering & Infrastructure: Transmission line tower foundation monitoring; construction quality monitoring; quantity tracking; progress reporting; contractor and stakeholder coordination; small-scale hydropower investigations.

Software & Technical Tools: AutoCAD (2D drafting); Microsoft Excel (quantity tracking and data organization); Microsoft Word (technical reporting).

Languages: Nepali (native); English (C1 Level); Hindi (B1/B2).

Leadership & Extracurriculars

Tribhuvan University Students Exploration Chapter (TUSEG)

- Assisted in organizing geological field trips and workshops.

Amnesty International – Tri-Chandra Youth Network

- Contributed to community awareness campaigns and social advocacy activities.

Youth Red Cross – Tri-Chandra Chapter

- Supported health outreach activities and blood donation drives.
