Academic Profile

Geology graduate from Tribhuvan University with a First Division bachelor's degree and more than three years of professional experience on a government infrastructure project. Combines academic training in geology, geomorphology, and soil mechanics with practical experience in field investigations, geological mapping, site assessment, foundation construction monitoring, surveying, and technical reporting. Author of a publication addressing flood hazards and infrastructure vulnerability in a high-mountain border region. Seeking a thesis-based Master's opportunity to develop advanced research skills and contribute to interdisciplinary investigations in geology, Earth sciences, environmental systems, and related fields.

Education

Bachelor of Science (B.Sc.) in Geology
Tri-Chandra Multiple Campus, Tribhuvan University, Kathmandu, Nepal
Final result: First Division, 60.35%
Relevant coursework: Engineering Geology, Geomorphology, and Soil Mechanics.

Higher Secondary Education – Science Stream, Civil Engineering Focus
Shree Padma Secondary School, Bhaktapur, Nepal
GPA: 3.19/4.00 (B+)
Relevant subjects: Geotechnical Engineering, Road Construction, Physics, Chemistry, and Mathematics.

Secondary Education Examination (SEE)
Shree Bhanu Jana Secondary School, Taplejung, Nepal
GPA: 3.32/4.00
Technical and Vocational Stream: Civil Engineering.

Research and Publication

Paudyal, S. (2026). "The Flood and Challenges of Rasuwagadhi–Kerung Border." *GeoWorld Students Journal*, Tribhuvan University.

- Examined flood dynamics and transboundary challenges in the Rasuwagadhi–Kerung corridor.
- Discussed geological, geomorphological, and infrastructure vulnerabilities in a high-mountain border region.
- Considered implications for disaster risk reduction and infrastructure resilience.

Publication:
https://portal.tu.edu.np/publications/422/GEOWORLDSTUDENTSJOURNALVOL_2026_01_13_13_41_46.pdf

Professional Experience

Civil Sub-Engineer
Rastriya Prasaran Grid Company Limited (RPGCL)
Mewa–Changhe 132 kV Transmission Line Project, Taplejung, Nepal
Experience: More than three years

- Supervise tower foundation construction in challenging terrain, monitoring site activities against engineering requirements and applicable safety standards.
- Conduct site investigations, levelling surveys, and soil testing to support construction planning and foundation-related assessments.
- Monitor construction quantities and maintain technical records, progress reports, and daily site documentation.
- Coordinate with contractors, engineers, and relevant authorities to support project implementation and address site-level issues.

- Contribute to construction monitoring and quality documentation through field observations and coordination with project stakeholders.

Fieldwork and Practical Training

Undergraduate Geological Fieldwork – B.Sc. Geology

- Conducted geological mapping and rock identification across different terrains.
- Applied geomorphology and soil mechanics concepts to assess terrain and site suitability for infrastructure development.
- Participated in field data collection, laboratory analysis support, and geological report preparation.

On-the-Job Training – Madhyaphawa Khola Jalabidhyut Co-operative Ltd.
Phung, Nepal | Six months

- Applied civil engineering and geological knowledge in small-scale hydropower project investigations.

Civil Engineering Internships – Suryabinayak and Phungling Municipalities
Nepal | Three months at each municipality

- Gained practical exposure to municipal civil works and local geotechnical assessments.

Technical Skills

Geological and Field Skills

- Geological mapping and rock identification
- Terrain assessment and geomorphological interpretation
- Site investigation and field data collection
- Soil testing exposure

Engineering and Project Skills

- Foundation construction monitoring
- Levelling and surveying
- Construction progress monitoring
- Quantity tracking and technical reporting
- Coordination with contractors and project stakeholders

Software

- AutoCAD – 2D drafting
- Microsoft Excel – data organization, quantity tracking, and reporting
- Microsoft Word – technical documentation

Leadership and Volunteering

Tribhuvan University Students Exploration Chapter (TUSEG)

- Participated in organizing geological field trips and workshops.

Amnesty International – Tri-Chandra Youth Network

- Contributed to community awareness campaigns and social advocacy activities.

Youth Red Cross – Tri-Chandra Chapter

- Supported health outreach activities and blood donation drives.

Languages

- Nepali – Native
- English – Fluent
- Hindi – Conversational
